About This Game

Thetaball is an authentic digital sport with challenging, physics-based gameplay and lifelike AI. Each of the game's 256 robotic players is a distinct individual, created by a process of simulated evolution; because the bots have co-evolved within a complex physical environment -- both cooperating with and competing against one another -- their behaviors are diverse, robust, and lifelike. The end result is a game with all the challenge and re-playability of a real-world sport.

In the single-player game, your task is to field a team of robotic athletes in order to advance through a series of progressively more challenging leagues, earning as many coins as you can along the way. You can remotely control any of the bots on your team, or let them play on their own.

In the local-multiplayer game, 2-8 players choose up sides, with AI-controlled bots filling in the empty slots.

About the Engine

Generator is a specialized 2D game engine based on Evolutionary Robotics, a technique for the automated creation of simulated robots. The engine provides a C++ framework for generating populations of such robots and deploying them in a completed game. It also includes a heavily optimized, glitch-free physics module for simulating the environments in which the robots interact and evolve. Thetaball is the first game built on the Generator engine; more are planned.

Some Thetaball Features

- A true physical (not statistical) simulation -- outcomes are determined not by "rolling dice" but by the actual physical

interactions between players.

- Lifelike AI -- every bot is a distinct individual with its own unique style of play.
- Extensive single-player game -- earn coins, develop your team, and advance through the leagues.
- Exciting couch multiplayer with up to 8 players -- a great party game!
- Play with a gamepad or mouse.
- Bet on individual matches or buy in to a tournament.
- Slow motion replays.
- Ultra-smooth animation.
- Monitor your coins with a variety of financial reports.
- Dozens of practice drills.
- Physics-based procedural sound.

Its a fun game and I would give it 7/10 at the price it being sold at and how it is ATM.

The downsides I found are having to go through the on rails tutorial for the 5? missions before it let you access options or anything other menus.

The controls advice is sometimes wrong, game seems to say scrolling down zooms in when it's really scroll up and the click and drag to move camrea and send ships it fine.. The last thing I remember is darkness. As my car overturned on the highway, all I can remember is being dragged out onto the lonely road, then darkness. As I open my eyes, I notice surroundings that are unfamiliar to me. It is dim in the room, but I can make out a few shapes in the shadows. I try to move my arms and legs, but cannot. I struggle for a few moments, before giving up and taking note of how cold it is. I try to call out for help, but my mouth is gagged with some kind of cloth. Suddenly, the lights turn on. I look down to realize that I am dressed like a mime from the stomach down, but the bra I am wearing is not mine. I look up and see organs lining the wall, and... Is that a head? Oh my god, I have to get out, I have to get out, I...

Oh, thank god, another person! He toddles up to me in a strange fashion before screaming at me to start dancing. Fearfully, I comply. The strange figure, though he is a few feet away, smells awful, his shirt streaked in what I hope isn't feces, his clothing in tatters, dirt caking his skin. His mouth cracks into a smile, his teeth missing. He reaches into his pocket, and I cringe in pain as he starts throwing change at me. The coins bounce off of my skin, leaving small welts, tears streaming from my face. The stranger moves back and forth, as if avoiding some object I cannot see, before ducking, getting back up, and starting over again. Flinching as the coins pelt me, the stranger takes this for agreement, and throws more coins at me. I fear I may die here.

2/10.. Why does this count as part of the season pass? it was release dlc. I could play this no matter what, because of I love playing zombie driver-ish games.

But ingame controls (and key mapping) is way too broken, making the game completely unplayable.. Nice little art-game.. Ended up returning this game for a refund.

I enjoyed it for about an hour. The puzzle mechanic is similar to the "record" mechanic in The Talos Principle where you create a clone of yourself, which is also used in Braid and P.B. Winterbottom.

Eventually, I hit a level where I was able to figure out the solution after a while, but I was unable to implement it because I didn't have the patience to endlessly tinker with figuring out the amount of steps that I needed to take and figuring out the spot in the level that I needed to end up landing on (because it's difficult to distinguish one spot from another). After that, I thought to myself, "Oh, I'm going to have this problem with every level from now on," and I quit playing.

I wish the game had an option to add a grid like the one option that's available in Snakebird. It would make the solutions much easier to implement. Would buy again if it's added in a future update.. Somebody was definitely high when they made and released this game because this is the gist of the whole game: Freddi is only seen in the opening cutscene and after that you're given a title screen which gives you the option to do either one player mode or two player mode. When I saw that there was this

melee mode, I played and all it was was some sort of survival mode for the game but before I go off topic, let me just save you the trouble by telling you this much about the game: it sucks! You play as Luther and all you do is pop bubbles with his slingshot to keep the water from draining out of the level you're on and along the way, you have to collect a certain number of Luther's worm doodles in order to proceed to the next level which is real easy. You know what's also real easy? If you click and hold the mouse button to fire the slingshot, Luther gets tired out for a few seconds. Get Luther trapped in a big bubble, you're out for five seconds. Get stung by a jellyfish, you're stunned for 5 seconds. Now as the game goes on, you would think something different would happen the more you play the game right? Well, the only thing that does happen is that you're given more obstacles to worry about further along in the game but to compensate, you can collect the sea urchins for bonus points but that's basically it for this game. If I was a kid back in 1996, even then I would be downright disappointed by this because I've played games JUST LIKE this one FOR FREE. It's a good thing I got the \$13 bundle cause I'll happily play and review Maze Madness once I'm done here but bottom line, don't bother with this game

UPDATE: I can happily say that after beating the game.....3 hours.....I AM EVEN MORE♥♥♥♥♥♥♥♥♥♥OFF!! I could easily speedrun the five main games in that amount of time!!!!!! I don't feel at all accomplished after beating this game. I just feel like I wasted so much of my time when I could've been playing other games. Now I'm dead serious when I said don't bother with this game. However, if you should happily say that you played this game and liked it....then you must have come from a whole different universe.....don't ♥♥♥♥♥ing dare come near this game. Trust me, I saved you 3 hours

Pros :

Almost everything

Cons :

Level selection is difficult, but once you figure it out, your likely to do a good job for the rest.

If you don't like challenge DO NOT PLAY! I like challenges so I love this game. The demo design is different from the full game though:V.

10/10. Nice game to expand your vocabulary. It doesn't help with grammar. Sadly just around 400 words. I somehow have the feeling that the producers are more interested in adding more languages than expanding the map since more languages do make more money I guess. At least I could not find any updates about an addon resp. all questions about it got ignored.

However, for 4.99 it is a nice game. I'm just a little bit frustrated that there is not more content :). Bad port. Don't buy unless you REALLY want to play some bad resolution single player/local Guilty Gear.. One of the best soundtracks of all time, just got better!

worth every cent.. I just finished the game and I enjoyed it very much. The atmosphere and music was so eerie and many times I was hesitant to venture on but I took a deep breath and continued. Nice puzzles, good graphics, good story line. I found this more scary than the Amnesia games, perhaps because this was a real life type game, no strange monsters chasing you, etc. I am ready to play the next game this developer makes. My opinion, "Good Job"!
